

---

Hello! !

Perfect, I'll help you find the ideal sailboat or catamaran for your trip to San Blas.

Let's get straight to the important part: † **The best boats book up fast**, especially during high season. If you already have dates, the best thing to do is check available options as soon as possible.

The first thing you need to decide (and what changes the experience the most):

### **Private Boat**

Exclusively for you and your group.

Maximum privacy, no shared spaces.

A more exclusive and personalized experience.

**This is the option our clients recommend most.**

### **Shared Boat**

- Share the boat with other travelers.
- More budget-friendly and a social atmosphere.

**IMPORTANT:** You will always have a private cabin, and in many cases, a private bathroom as well. You have your own space, but you share the experience.

### **è In short:**

- If you want to truly disconnect → **Private**
- If you want to optimize your budget → **Shared**

### **Sailboat or Catamaran**

- **Sailboat** → More authentic and economical.
- **Catamaran** → More comfortable, stable, and spacious.

If you have doubts, we can provide a recommendation based on your trip.

### **Type of experience you are looking for**

Total relaxation (disconnecting, silence, nature).

Exploration (visiting several islands).

- E More social or lively.
- Premium experience.

**How we work (and why it saves you time)** We don't send endless catalogs.

We select **2–3 options** that actually fit your needs and are available on your dates.

And we tell you clearly which one to choose.

**Important right now** Availability changes quickly. Many clients miss out on great options by waiting.

Send me the following and I'll send you the options today:

- **Exact dates**
- **Number of people**
- **Approximate budget per person**
- **Private or shared**
- **Sailboat or catamaran (if known)**

With that, I will send you real available options + our direct recommendation. If you see one that fits, it can be blocked quickly.

Reply with those details and we'll look into it right away.
